

# ST002 Series

## THERMODYNAMIC DISC STEAM TRAP

ISO9001 Certified

Duco® Thermodynamic disc trap is an extremely robust steam trap with a simple operation. The trap operates by the dynamic effect of flash steam as it passes through the trap. The only moving part is the disc on of the flat surface between the chamber and the cap. Extremely easy to maintain by opening the top cap without the need of removing the valve from the steam line.
