

HOW TO **SHORTEN A METAL ZIPPER**

Tips and Techniques on Sewing - *Illustrated For You!*

TOOLS NEEDED: End Nippers, Needle Nose Pliers, Metal Zipper, Zipper Top Stop

Mark the new length of the zipper.
Pull off metal teeth above the new
length mark using either end nippers
or needle nose pliers.

Continue to pull off as many
teeth as needed.

Attach zipper top stop using needle
nose pliers. (Zipper top and bottom
stops available in various colors
and sizes at www.WAWAK.com!)

Repeat above steps for other
zipper side.

Trim off the excess zipper tape.
